## Severe Thunderstorm Potential: 2 PM - 10 PM

Highest threat in SE Texas Panhandle

Weather Forecast Office  
Amarillo, TX  
Issued Jun 19, 2020 8:06 AM CDT

Severe storms are possible today from between 2 PM to 10 PM across the Texas and Oklahoma Panhandles. Highest threat this morning has shifted further southeast ahead of the cold front. The primary hazards with any storms in the area will be from a possibility for localized damaging wind gusts to 60 mph, localized flooding due to slow moving thunderstorms, and large hail.

## Scattered Thunderstorms Possible Friday

Storms may be severe

Weather Forecast Office  
Lubbock, TX  
Issued Jun 19, 2020 5:30 AM CDT

Temperatures will warm into the upper 80's to low 90's this afternoon. Thunderstorms, some severe, will be possible this afternoon and evening with the main threats of isolated damaging wind gusts to 80 mph and hail up to 1.5" in diameter. Locally heavy rainfall and frequent cloud-to-ground lightning can also be expected from any storms.

# Hazardous Weather

Severe storms will be possible tonight across West Central Texas, with highest risk along and northwest of a Sterling City to Robert Lee to Fort Griffin line. Large hail and damaging winds are the main threats.

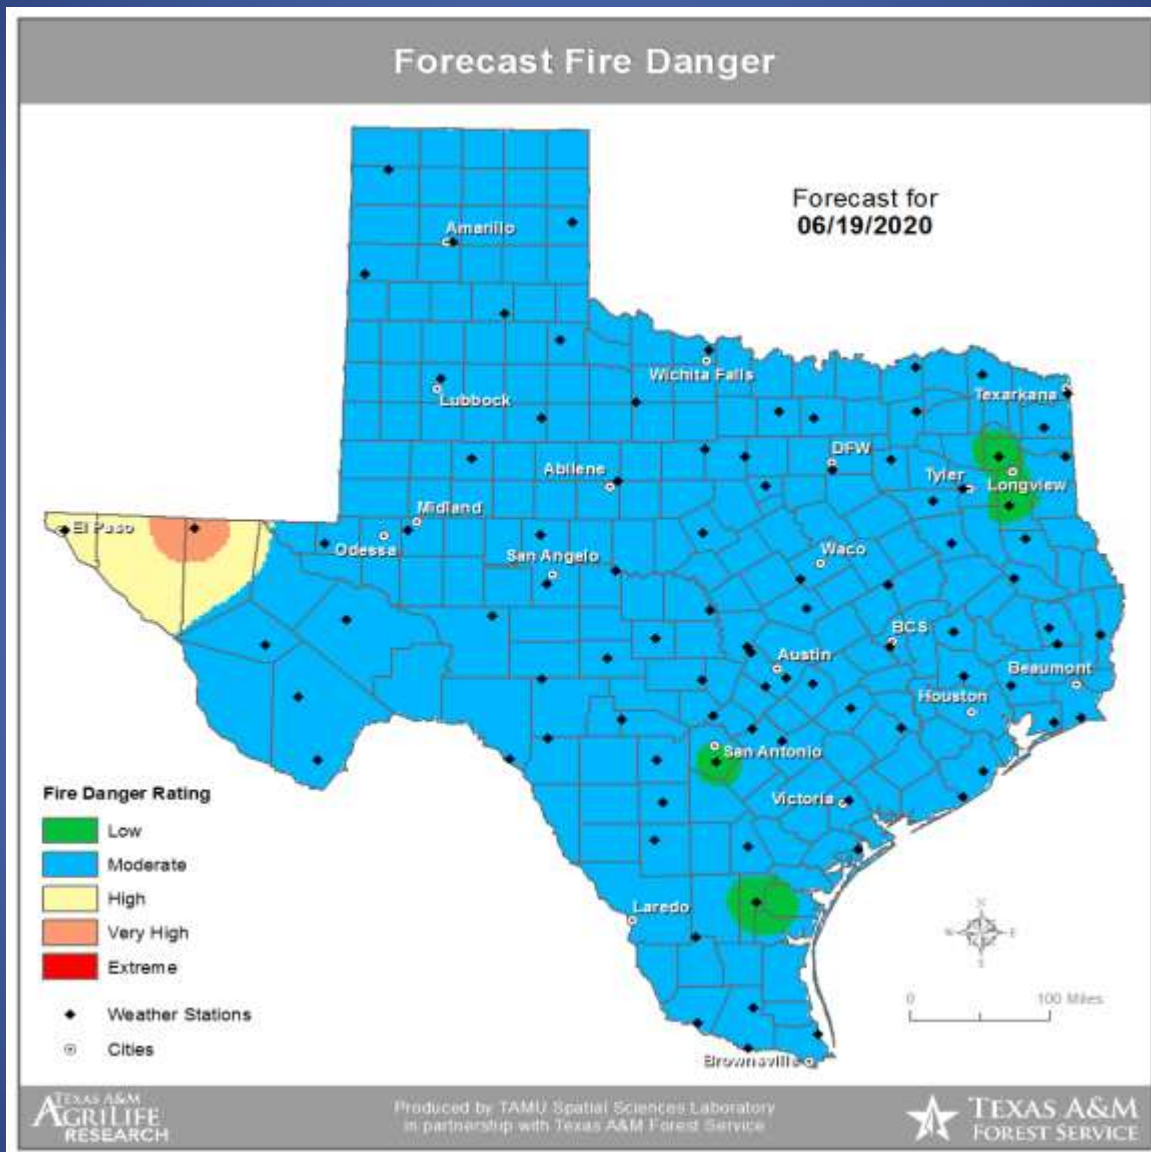

A slight risk for severe thunderstorms today across southwest Oklahoma and portions of western north Texas, with a marginal risk across central and northwest Oklahoma. Up to quarter size hail and 80 mph winds gusts are the main hazards under the severe storms. The timing for severe storms would be between mid-afternoon into the early evening hours.
